BASIC LINE

BASIC LINE

Group of door panels embossed in PVC (white) and ABS (veneers). ABS is a very impact-resistant material that strongly reflects the sun's UV rays. It has very good thermal insulation properties, and at the same time it does not deform itself when the temperature changes. Both materials are of high quality and have a long aging period. Basic Line fits both modern and classic construction.

PARAMETERS:

- standard size 850 x 2000 x 36/48 mm
- reinforcement made of waterproof plywood 8 mm
- all models are available in veneer and white, as well as cream-coloured RAL 9001;
- thirteen standard glazing variants: Thermofloat, VSG 3.3.1, Satinato, White Chinchila, Brown Chinchila, Mastercarre, Masterpoint, Brown Stopsol, Colourless Delta, Brown Delta, Delta Mat, Crepi and Flutes.
- possibility of using inter-pane muntins (8.18.25 mm) in the following colours: white RAL 9016, silver, gold, pearl copper RAL 8029, dark grey, golden oak
- the remaining colours of veneered and painted muntins are available for the width of 18 and 25 mm

Attention: The pattern is only double-sided.

BASIC LINE

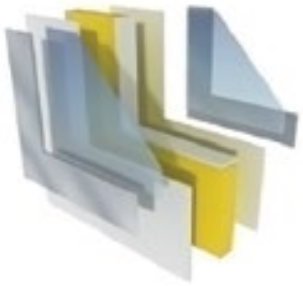
ECONOMIC LINE

ECONOMIC LINE

It is a group of the exclusive door fillings combining high aesthetics and current trends in designing the modern door structures. It contains fillings with the INOX stainless steel applications that hold the glass element. Their extraordinary precision is possible thanks to the use of laser processing technology. To distinguish them from other models, they are marked with a letter "A".

PVC PARAMETERS:

- standard dimensions 900 x 2000 x 36/48 mm PVC
- structure: 2.0/20/2.0
  2.0 mm PVC board
  hard polystyrene foam,
  2.0 mm PVC board.



Attention: Two-sided applications as standard

FASHION LINE

FASHION LINE

It is a group of fillings with a unique design and modern form. Perfect for the customers with a sophisticated taste who value originality. You can find a variety of patterns here, from geometric shapes to openwork accents. In combination with the various types of glazing, you can get an original visual effect.

PARAMETERS:

- standard size 850 x 2000 x 36/48 mm
- available only in smooth white, not veneered, RAL 9016

Attention: The pattern is only double-sided.

GLASS LINE

GLASS LINE

GLASS LINE

It is an exclusive series of the original, full glass fillings for demanding customers, in which a digital print is applied directly to the glass. We offer many different digital print projects, in which you can choose the most appropriate filling. Glass Line is characterized by a unique design, long service life, good thermal insulation properties and gives the door structure strength and stability.

PARAMETERS:

- standard dimensions 900 x 2000 x 36 mm,
- maximum filling size 1300 x 2200 mm,
- glazing arrangement: 44.2 / warm frame / 43.1 TF
  (anti-burglary glass 44.2 with print / warm frame / safety glass with thermal coating)
- minimum filling size 700 x 1600 mm

REINFORCEMENTS

There is a possibility to use an additional aluminium plate inside the filling structure as a reinforcement. This significantly improves the stiffness of the panel, acoustics and anti-burglary parameters. As standard, we offer a thickness of 2 mm.

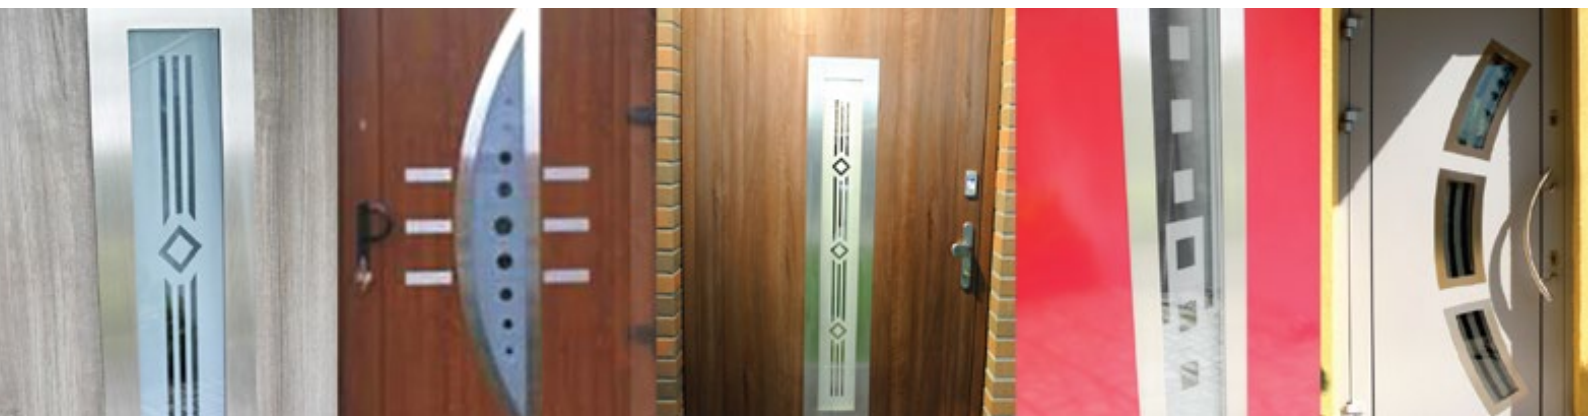
SAND GLASS

Glass sandblasting is the process of the specialised abrasive treatment of the glass surface, leading to the removal of the top layer of glass, resulting in visible tarnishing. The use of this technology gives extremely delicate and subtle results. Sandblasting the glass makes it possible to create any pattern that decorates the surface in a unique way. In addition to the following patterns, it is also possible to make an individual pattern at the customer's request.

PIASEK 01 PIASEK 02 PIASEK 03 PIASEK 04 PIASEK 05 PIASEK 06 PIASEK 07 PIASEK 08 PIASEK 09

The above patterns of sandblasted glass are dedicated to the following models:

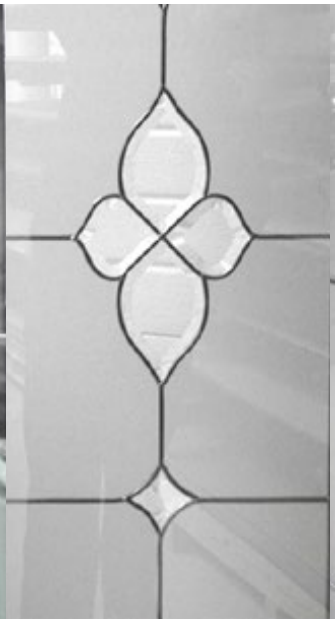
- EK-02(A)/ EK-44(A) / EK-45(A): PIASEK 01, PIASEK 02, PIASEK 03, PIASEK 08
- EK-04(A) and EK-04/6(A): PIASEK 04, PIASEK 05, PIASEK 06
- EK-05(A) and EK-15(A): PIASEK 07
- EK-50(A) and EK-51(A): PIASEK 09

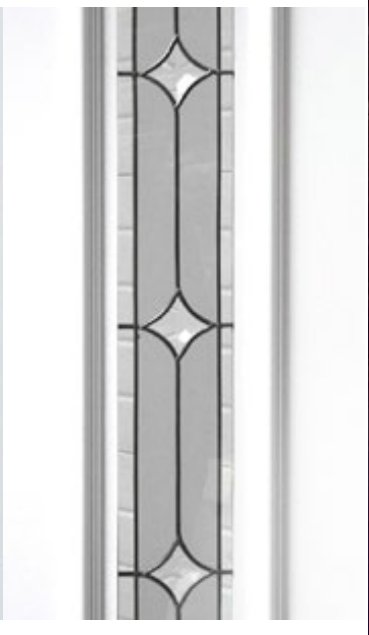


STAINED GLASS - BEWELA, DECORGLAS, FUSING, TIFFANY SERIES

Stained glass are an effective decoration of the door. Their luminosity and colour create a unique atmosphere. They create the "magic of light". Doors decorated by stained glass undergo a striking visual transformation, both in stylized and modern buildings.

Stained glass, being a decorative element, at the same time has the utility functions - it protects from unwanted views, protects against too strong sunlight, or ensures discretion. When used in the door, it can be a painting, simple geometry or an intricate arabesque, and it can also contain the heraldic elements or a company logo.





DECORATIVE BEVELS

DECORATIVE BEVELS

We present sets of decorative bevels. Their advantage is the possibility of using in each door fillings series, which opens up many possibilities for you. Bevels add character, elegance and individuality to the front door. They can be applied to any type of glass, except: Colourless Delta, Brown Delta, Delta Mat, Kathedral, Flutes and Colourless Altdeutsch.

3D INOX APPLICATIONS
3D INOX INLAYS

3D APPLICATIONS IN INOX STAINLESS STEEL

3D convex elements are fixed elements welded to the INOX applications. Our decorations are characterized by exemplary workmanship and a modern shape that gives the door an extraordinary look. Thanks to the properties of stainless steel, such as durability and nobility, we guarantee complete customer satisfaction with the purchased fillings. We can apply them in models EK-04(A), EK-04/6 (A), EK-17(A), EK-18(A), EK-02(A), EK-44(A), EK-45(A), EK-51(A).

(fillings 38-110mm thick)

CAT DOOR

CHIP VERSION

(opened with a chip mounted most often on the cat's collar, the chip enables the automatic opening of the passage)

Inner size (flap opening): 14.2 cm x 12 cm,
outer size: 21.0 cm x 21.0 cm

MECHANICAL VERSION

Inner size (flap opening) 5.5 cm (D) x 18 cm (W) x 19.5 cm (H), is suitable for a cat with a waist circumference of less than 60 cm, outer size 5.5 cm (D) x 24 cm (W) x 27.5 cm

MAIL SLOTS

We offer the mail slots in three colours of aluminium: silver, white and gold. We offer the installation of the slots in each of our series of fillings. Filling thickness from 36 mm to 70 mm maximum.
